

Project Objective

To develop an online learning platform where students can enroll in Logistics 101, pay through Philippine payment methods, access downloadable course materials, and retain lifetime access to their purchased courses.

Target Audience

- Beginners interested in logistics and freight brokerage.
- Aspiring logistics coordinators, dispatchers, and track-and-trace specialists.
- Virtual assistants seeking logistics-related skills.
- Individuals preparing for logistics employment opportunities.

Primary Website Goals

1. Introduce and promote the Logistics 101 course.
2. Allow students to register and purchase courses.
3. Accept GCash, Maya, and bank transfers.
4. Allow students to upload payment proof. Need nako ma verify and mag give kog approval once ma confirm nako na nag sulod ang payment.
5. Provide downloadable PDF modules after manual payment approval.
6. Allow administrators to manage students, payments, and course materials.

Student Payment Process

1. Student registers an account
Student provides name, email, and password.
2. Student selects Logistics 101
Website displays course inclusions and price.
3. Student chooses payment method
GCash, Maya, or Bank Transfer. - Mag-show ang mga QR codes
4. Student submits payment
Student uploads proof of payment and enters transaction details.
5. Admin verifies payment
Admin checks the payment and approves or rejects the submission.
6. Student receives access
Upon approval, the course appears in the student's dashboard. It may take up to 24 hours for verification

7. Student can log in and download the purchased materials whenever needed, subject to the published terms.

Payment statuses you should implement

Status	Meaning
Pending	Awaiting admin verification
Approved	Payment verified; course access granted
Rejected	Payment proof invalid or payment not confirmed
Resubmission Required	Student needs to submit corrected proof
Refunded	Payment returned and access handled according to policy

Security note: Uploading a payment screenshot should not automatically grant access. The administrator must verify the actual payment first.

ADMIN DAHSBOARD

Should allow me to operate the training business without needing you every time naay mag-enroll or mag-update ug module.

Admin Dashboard – Required Functions

View total registered students

View pending payment submissions

Approve or reject payments

View payment proof and transaction details

Manually enroll students when necessary

Upload, replace, and remove PDF modules

Create and edit courses

Manage student accounts

Reset student passwords or trigger password resets

View enrollment and payment reports

Send enrollment confirmation emails

Export student and payment records
